FOR IMMEDIATE RELEASE

National Awards Recognize Engineering Contributions to Economy, Environment and Society

(Ottawa) October 28, 2015 – Twenty leading-edge projects benefiting our economy, environment and society received the highest recognition for engineering excellence Friday night at the 2015 Canadian Consulting Engineering Awards Gala. The awards, which are presented jointly by the Association of Consulting Engineering Companies-Canada (ACEC) and *Canadian Consulting Engineer* magazine, recognize consulting engineering firms and their projects in terms of high quality, innovation and technical excellence.

“These awards highlight the outstanding talent and expertise of Canadian consulting engineering firms,” said ACEC President and CEO John Gamble. “By recognizing these projects with national awards, we are showcasing the important contributions of engineering firms to Canadians and the huge impact they have both here at home and around the world.”

Twenty-six awards were handed out at the event, including 20 Awards of Excellence, in a range of categories. Of these projects, five were recognized with Special Achievement Awards for demonstrating a high level of technical innovation, environmental stewardship, Canadian expertise abroad, engineering that enhances Canadians’ quality of life, and company benevolence in Canada or internationally.

In addition, ACEC presented its 2015 Beaubien Award to Dale Craig, P. Eng. The Beaubien Award is an honour bestowed on an individual each year for their exceptional service to the association and contribution to the consulting engineering industry and profession.

Award winners were selected by a panel of 12 independent jurors who have distinguished backgrounds in various sectors of the industry.

ACEC represents companies in Canada that provide professional engineering services to both public and private sector clients. These services include the planning, design and execution of all types of engineering projects, as well as providing independent advice and expertise in a wide range of engineering and engineering-related fields. For more information about ACEC and the 2015 Canadian Consulting Engineering Awards, please visit www.acec.ca.

Canadian Consulting Engineer is a bi-monthly magazine for engineers in the construction industry. It is a division of Annex Publishing & Printing Inc. The award-winning projects are described in full in the October-November 2015 issue of *Canadian Consulting Engineer* at <http://www.canadianconsultingengineer.com/digital-edition/>.
